

To Whom It May Concern,

Tiago as a partner of Wuni Studios helped in the development and conceptualization of the Wuni Studios technical department. As a predominantly visual design based company, we wanted to take advantage of the backend of web in order to create more nuanced, practical, and technically sound websites for clients that looked as well as it functioned.

Tiago took initiative in his role by developing the company website and other client based sites. With his development and social skills, a good workflow was established between the visual and coding department which allowed for very successful projects for that summer. Tiago is a hard working individual who pays attention to detail. His work ethic and communication skills make him a valuable member of any team.
